

STENOS 1" SQUARE TRIMLESS DOWNLIGHTS

*optics and light engines are field-changeable

DOWNLIGHTING NEVER LOOKED SO SMALL

The Stenos 1" Square micro-optic downlights come with a variety of features in a micro form factor, making it easy to blend in while providing high-quality lighting and performance. These downlights are available in both trimmed and trimless profiles and come with magnetic interchangeable beam shaping

accessories that allow for precise control of the lighting environment. Additionally, the STENOS downlights are all constant voltage, which means multiple fixtures can operate from a single power supply, resulting in a simplified installation process and cost savings overall.
